Solution-driven front end developer adept at contributing to highly collaborative work environment, finding solutions and determining customer satisfaction. Proven experience developing consumer-focused websites using React JS, HTML, CSS , bootstrap and JavaScript. Built products for desktop and mobile app users around 4 years, meeting highest standards for web design, user experience, best practices and speed. Designed and developed web applications across multiple APIs, third-party integrations and databases.

Technical Profile

- React.js
- JavaScript
- HTML
- Bootstrap
- CSS
- SCSS
- Media Queries
- REST API development
- Node.js
- GitHub
- JIRA
- Confluence

Competencies

Software Development

Code debugging

UI improvements

Front End Web Development

CSS

Agile Workflow

Project estimations

Requirements gathering

📁 Work History

2021-06 - Current

Senior Developer

Publicis Sapient

- Optimized performance through testing and tuning of applications.
- Proficient in building web user interface (UI) using HTML, CSS, React.Js, Material UI, JavaScript, DOM and Ajax that follows standards and are browser compactable with UI responsive.
- Developed React Core Components for building front-end applications.
- Worked on necessary changes which fixes a bugs according to sprints in JIRA.
- Gathered requirements from the client, prepared estimates & requirement specification and developed specification documents along with team members
- Worked with users to gather requirements and evaluate ease of use.
- Led development team that created web and mobile user interfaces.
- Planned and developed interfaces that simplified overall management and offered ease of use.
- Evaluated project requirements and specifications and developed software applications that surpassed client expectations.
- Coded using HTML, CSS and JavaScript to develop features for both mobile and desktop platforms.
- Improved tools to boost user interaction and deliver design versatility.
- Collaborated with stakeholders during development processes to confirm creative proposals and design best practices.
- Tested web-based product functionality and delivered iterations to customer.
- Transformed native applications into mobile-friendly products.
- Teamed on user-centric design strategy in translation of UX and business requirements into coded solutions.

2021-04 - 2021-06

Software Developer

Neubel Technologies LLP

- Proficient in building web user interface (UI) using HTML, CSS, React JS,Material UI, JavaScript, DOM, and Ajax that follows standards and are browser compactable with UI responsive.
- Developed React Core Components for building front-end applications Revised, modularized and updated old code bases to modern development standards, reducing operating costs, and improving functionality.
- Documented technical workflows and knowledge to educate newly hired employees.
- Revised, modularized and updated old code bases to modern development standards, reducing operating costs, and improving functionality.
- Collaborated on stages of systems development lifecycle from requirement gathering to production releases.
- Tested and deployed scalable and highly available software products.
- Corrected, modified and upgraded software to improve performance.

- Rapidly prototyped new data processing capabilities to confirm integration feasibility into existing systems.
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development

2019-03 - 2020-04

Software Developer

Wavelabs Technologies

- Coordinated with project management on database development timelines.
- Designed intuitive graphical user interfaces to improve user experience.
- Designed reusable and reliable code for use within distributed cloud environments.
- Pioneered new methods of code review to incorporate wider range of voices.
- Developed solutions for Business Problems in the form of web portals using React.
- Defining and discussing a user stories as a Part of Agile Scrum Team in Scrum calls and meetings.
- Working and contributing to software improvements (products, processes, methods, tools), design inspection and code review.
- Gathered requirements from the client, prepared estimates & requirement specification and developed specification documents along with team members.
- Testing modules developed by self and team to ensure that these were as per desired quality standards; creating test specifications and conducting tests as per an same.
- Revised, modularized and updated old code bases to modern development standards, reducing operating costs, and improving functionality.

Education

2016-06 - 2018-05

Bachelor of Science: Computer Science

Gayathri College of Science And Management - Andhra Pradesh
